SSA

Site Selection / Access

- Recreational Access
- Navigational Access and buffers
- Clear boundary marking
- Set min. level
- Perimeter buffers
  → Navigation

- What about - off-lease considerations
- Off-lease gear/vessel practices to account for habitat species, other users.

MOM MATERIALS.

OPERATION & MAINTENANCE ons

- Education / Training
- Solid waste Management
- Operational discipline
- Split out human uses
- What about - off-lease considerations?
- OFF-lease gear/vessel practices to account for habitat species, other users

MEQ

Maintaining Environmental Quality

Diane Wyndham

— Align with but not duplicate standards set or reviewed elsewhere.

— Set a minimum acceptable level

— B Sensitive habitats, EFH

— Special status species

— Keystone species

— Eelgrass — Use habitat maps & add a habitat boundary buffer

— NOAA Eelgrass mitigation policy → tool

General

— Could adopt a standard set of BMPs & areas for specialization
— Baseline data on % bays in lease to inform discussions
→ FRAME OF REFERENCE
— Goal → aim high; set benchmarks
— Measurable (& enforceable) Standards.
— Global - evaluate
— cumulative impacts ← OFF Lease
— Lessons from Humboldt
— Carrying capacity
— Suggest Regional plans that at minimum map known uses, known areas habitats to safe-guard, etc, to help define ⇒ inappropriate Siting of farm
— Define outcomes you are targeting w BMPs

~~BTC~~ Disease Prevention

- Use of sterile oyster seed for some non-natives

- Managing risk of naturalizatio of non-native cultivars

- Adherance to established standards is assumed.
